Cloudphysician

Growing the critical care practice at a community hospital

## Multispecialty hospital with 31 ICU beds

PROBLEM

A community hospital with a strong multispecialty team needed ICU specialists to start and grow the ICU. This was impacting the hospital's ability to retain patients and compete with other hospitals in the region.

IMPACT

Cloudphysician intensivist-led team in a matter of days started the ICU operations by starting with low acuity and then to more complex cases. Cloudphysician upskilled the hospital team, collaborated with consultants, and even assisted in selecting the right ICU devices to procure. The hospital has now grown into a high functioning ICU, even adding more ICU beds to better cater to the patient needs. This Cloudphysician empowered hospital played a heroic role during COVID-19 by increasing its capacity to deliver excellent outcomes for hundreds of critically ill patients.

Monthly Admissions & Patient Days
