

## **CLOUDPHYSICIAN**

[Cloudphysician](#) aspires to be the global virtual hospital. We are reimagining the delivery of critical care through patient-centric solutions. We use our advanced technology, designed and developed in-house, to increase access to care, all across the globe. Cloudphysician has been radically transforming delivery of critical care by impacting thousands of patients across India and enabling them to receive high quality care irrespective of their location and is moving towards mainstreaming this model globally.

Our Care Center, based in Bangalore, is staffed 24/7 by a highly qualified and trained critical care team that includes super-specialist doctors, nurses, dieticians, and pharmacologists. The clinical team uses our proprietary platform, RADAR, to connect to hospital ICUs to oversee and manage the care of critically ill patients across multiple regions. RADAR, built by our team of technology experts, incorporates automation, computer vision, real-time video, and data analytics to help expert care providers connect to and provide care to patients.

We have cared for nearly 50,000 intensive care patients across 16 states in India and saved numerous lives.

## **JOB DESCRIPTION**

Cloudphysician is looking for a Nurse Practitioner with 5-10 years of critical care experience. The NP will work closely with intensivists, physicians, CCRN and RNs. The successful candidate must be able to build strong working relationships and bring a positive energy and curiosity to the position. Candidates interested in training and research are strongly encouraged to apply.

1. The NP, in collaboration with the interdisciplinary team, will be responsible for the care of intensive care patients (medical, cardiac, surgical, & pulmonary) and participate in inpatient care.
2. Assignments will also include rotation to bedside hospitals as needed. Other responsibilities include but are not limited to: Provide comprehensive care for critically ill patients in the ICUs including, but not limited to, obtaining accurate patient history, performing comprehensive physical exams, systematically ordering & interpreting diagnostic tests, & accurately documenting findings in the electronic medical record
3. Caring for patients with multiple complex surgical & medical conditions to include COVID patients, mechanical ventilation, intra-aortic balloon pump, continuous veno-venous hemodialysis (CVVHD), etc.
4. Be familiar with general ventilator management.
5. Follow unit-specific protocols & deliver evidence-based care.
6. Work collaboratively with the health care team including Pulmonary, Cardiology, Intensivist, & Surgery physicians; anesthesiologists; other physicians involved in the critical care or surgery patient care units; nurses; case managers; physical & occupational therapists; & any other departments affecting the care of the critical care patient.
7. Experience with common ICU procedures including but not limited to enteral tube placement, interpretation of electrocardiograms, arterial puncture. Initiates appropriate referrals & consultation based on patient & family needs.
