

## **CLOUDPHYSICIAN**

[Cloudphysician](#) aspires to be the global virtual hospital. We are reimagining the delivery of critical care through patient-centric solutions. We use our advanced technology, designed and developed in-house, to increase access to care, all across the globe. Cloudphysician has been radically transforming delivery of critical care by impacting thousands of patients across India and enabling them to receive high quality care irrespective of their location and is moving towards mainstreaming this model globally.

Our Care Center, based in Bangalore, is staffed 24/7 by a highly qualified and trained critical care team that includes super-specialist doctors, nurses, dieticians, and pharmacologists. The clinical team uses our proprietary platform, RADAR, to connect to hospital ICUs to oversee and manage the care of critically ill patients across multiple regions. RADAR, built by our team of technology experts, incorporates automation, computer vision, real-time video, and data analytics to help expert care providers connect to and provide care to patients.

We have cared for nearly 50,000 intensive care patients across 16 states in India and saved numerous lives.

## **JOB DESCRIPTION**

We are looking for a full-time mobile developer with proven expertise in React Native. You will design and develop features for our mobile app for the Cloudphysician platform as it connects a centrally located team of medical experts to various peripheral hospital locations, thus enabling them to provide real-time monitoring and care for the sickest patients.

## **KEY RESPONSIBILITIES**

As a part of your core duties, you will be responsible for:

- Designing and developing pixel perfect UIs and a seamless user experience for mobile users
- Develop secure software keeping patient safety at the forefront of design
- Work with our medical experts and implement intelligent patient care and monitoring features
- Researching and identifying new directions for mobile platform
- Diagnose and fix bugs and performance bottlenecks for performance that feels native

## **PREFERRED QUALIFICATIONS**

- Bachelors or higher degree in Computer Science or a related field
- Expertise in React Native is essential for this position
- 2+ years of experience in mobile app development
- Solid programming skills in Javascript/Typescript
- Express/NodeJS experience is a bonus
- AWS or GCP experience is a bonus
