Engineering Manager (Bengaluru)

Cloudphysician

CLOUDPHYSICIAN

Cloudphysician is a healthcare company reimagining the delivery of critical care through patient-centric solutions. We use our advanced technology, designed and developed in-house, to increase access to care all across the globe.

Our Care Center, based in Bangalore, is staffed 24/7 by a highly qualified and trained critical care team that includes super-specialist doctors, nurses, dieticians, and pharmacologists. The clinical team uses our proprietary platform, RADAR, to connect to hospital ICUs to oversee and manage the care of critically ill patients across multiple regions. RADAR, built by our team of technology experts, incorporates automation, computer vision, real-time video, and data analytics to help expert care providers connect to and provide care to patients.

As of May 2025, we have cared for over 1,50,000 plus intensive care patients across 23 states in India and saved numerous lives. Learn more at: www.cloudphysician.net.

JOB DESCRIPTION

We are looking for an experienced and driven Engineering Manager to lead a team of software professionals and deliver high-impact technology solutions. You will play a key role in both people and technical leadership, owning project delivery, mentoring engineers, and collaborating with cross-functional teams to scale our technology and systems.

RESPONSIBILITIES

- On-time delivery of high-quality, secure, and optimal code
- Drive technical execution and delivery of complex software projects, ensuring quality, scalability, and reliability.
- Collaborate with Product Managers, Designers, and other stakeholders to translate business requirements into engineering plans.
- Developing detailed technical plans for new designs and products.
- Ownership of architectural decisions and ensuring best practices across the team (code reviews, unit testing, CI/CD, etc.)
- Manage development timelines, resource allocation, code quality and risk mitigation.

PREFERRED QUALIFICATION

- Bachelor's or Master's degree in Computer Science, Engineering, or related field.
- 10+ years of overall experience in software engineering, including 5+ years in a leadership or management role.
- Very strong technical background with experience in full-stack Javascript-based technologies - React/Angular, Node/Express, MongoDB etc.
- Experience working in agile/scrum environments with cross-functional teams.

- Experience leading web, mobile, and backend teams.
- Strong understanding of algorithms, software architecture, and modern frameworks.
